INDIANA UNIVERSITY

Internship Progress Report Y399: Project in Professional Practice

This status report should be completed no less than once every two weeks but can be submitted weekly. It has four parts: a log of your hours worked; the status of your project; a description of your tasks, activities and observations; and your supervisor's acknowledgment.

I. Log of Hours

Student's Name: **Abhimanyu Chaddha**
Canvas Section: **1399 (Fall Section)**

Semester Term / Year: **Summer 2026**

Maintain a log of all hours applied to the internship.

Date	Total Hours	Primary Work Task
07/27	8.53	We readjusted the frontend to match with the company's formatting and worked to refactoring it most of the day.
07/28	8.40	After refactoring the frontend, we focused on the backend and found there was a bug that contradicted the admin prompt in itself and focused on refactoring it.
07/29	8.02	We had to change the formatting of the letter to fit with company expectations. We also made changes to the review letter page as a way to make it easier for the user to understand they are in a different page than the main chat.
07/30	9.00	We had to remove the tone tab for the time being just to test out the main feature and have it working without any problems (the generate letter feature).
07/31	6.02	We had to use system design concepts to test the app and make sure it doesn't break before production on Monday. We also added a way to monitor feedback better.
08/03	8.87	We finally deployed the app to production and monitored for any potential fixes needed immediately. We had to fix up a couple of important bugs before production.
08/04	8.9	We found an important bug regarding handwritten notes we hadn't adjusted for. We had to implement an error message for the time being and started working on a feature for it using Azure Document Intelligence.

08/05	8.02	We focused on finishing up Azure Doc Intel in the app and started to test it out to see how accurate it is for reading handwritten notes.
08/06	8.05	We needed to connect Microsoft OneNote to the app since a lot of people stored notes there. We also focused on making small animation changes to the app, so it feels smoother in terms of user experience.
08/07	6.17	Last day. Just looked over the app for any potential problems and any last-minute revisions before we leave.

Total: 79.97 hours Internship Accumulated Hours: 380.66 hours

II. Project Status Report

Review the project plan (work breakdown structure) and include here the work tasks from the date range of this report that matches the dates on your project plan. Then, include a project status for each of those work tasks, whether the task is complete or incomplete, and indicate whether you are behind, on or ahead of schedule.

<i>Work Task</i>	<i>Completion status</i>	<i>behind schedule</i>	<i>on schedule</i>	<i>ahead of schedule</i>
(example) Review Project Proposal	Complete			X
	Incomplete			
(example) Complete the Project Plan	Complete			
	Incomplete		X	
Deployment	Complete			X
	Incomplete			
Final Documentation	Complete			X
	Incomplete			
Bug fixes of the app	Complete			X
	Incomplete			
Testing with advisors	Complete			X
	Incomplete			
Bug fixed based off feedback from advisors	Complete			X
	Incomplete			
	Complete

	Complete			
	Incomplete			

III. Log of Tasks, Activities and Observations

Provide a summary of tasks, activities, and observations for the period of this report. This should be a narrative of the work tasks listed in part II of this report. Include any responsibilities or duties you may have had and what you learned each day, etc. For work toward the project goal, please provide **adequate technical details**. *Submit evidence of your work in the form of screen captures as appropriate.*

During this stretch, I spent most of my time refactoring, testing, and getting our letter-generation app ready to push live to production. The first few days were a mix of updating the UI to fit company standards, fixing a backend bug where the admin prompts were conflicting with each other, and tweaking the letter review page so users could actually tell they weren't in the main chat anymore. To make sure the core app wouldn't break before launch, I took out secondary features like the tone tab so I could focus purely on stress-testing the generation feature. After clearing out some last-minute bugs, we officially launched to production on August 3rd and kept a close eye on the monitoring setup to catch any immediate crashes.

Right after launch, we noticed a pretty big gap—the app didn't handle handwritten notes at all. I threw up a quick error message so the app wouldn't crash for users, and then spent the next couple of days integrating Azure Document Intelligence to OCR and read those notes properly. Toward the end of the week, I connected Microsoft OneNote so people could import their notes directly into the app, and added some smooth UI animations to give it a cleaner feel. I spent my last day double-checking everything, running a final health check, and making sure the app was totally stable before handing it off.

IV. Supervisor acknowledgement

To the supervisor: upon completion of the required hours, please meet with the student to a) review this report, b) evaluate the student's performance, and c) acknowledge the work described above by signing below, and by initialing each page of the report.

Please return this report to the student for professional development, and for submitting to their internship instructor. **Thank you.**

(Optional): Write any additional comments or feedback to the student in the space provided. Please note these comments will be seen by the student's internship instructor.

SUCCESSFULLY LAUNCHED FLAW TO MUCH
ACCLAIM. EXCELLENT INTERNSHIP.

ANDREW TECCITACCI
Name of Supervisor (please print)
